Summary

I am a software fanatic with a dynamic journey that began in high school, where I first fell in love with coding through Delphi and SQL. Now, as a senior at North-West University (NWU), I've broadened my expertise across multiple programming languages and technologies. My current passion lies in web development, where I'm diving deep into JavaScript and modern frameworks like React and Next.js. I aspire to be a backend developer, driven by a desire to build robust and efficient server-side applications, while also nurturing my full-stack capabilities to stay versatile and innovative.
